

### **Overseas Engagement Policy**

Care for the Family's primary purpose is to strengthen family life in the UK and the Isle of Man. However, we are thrilled that others from further afield have been able to access our events online and physical resources. Unfortunately, due to the personal nature of our support and training days, plus the financial and practical constraints of communicating internationally we are unable to offer these to an audience beyond the UK. In addition, for these same reasons we cannot guarantee a reply to correspondence or offer any ongoing support to those living outside the UK.
